## COLLEGE

---

### Instituto Tecnológico de Estudios Superiores de Monterrey

- Bachelor Degree in **Computer Science**

*Aug,2019-Dec,2024*

## EXPERIENCE

---

### Altas Cumbres Technologies

*Junior Full Stack Developer Jr*

*Jan,2023-May,2024*

- Implemented custom web applications using Django for logistics and parcel delivery companies, integrating server-side logic and database features to meet specific clients needs.
- Managed robust and efficient databases with PostgreSQL, optimizing scalability to accommodate future changes requested by the client and improving data query performance.
- Designed and developed sales landing pages and internal dashboards using Bootstrap and HTML/CSS

### Redita

*Freelance Full Stack Developer*

*Jul,2024-Jul,2025*

- Delivered a full-featured web application for managing accounts, inventory, and employee administration, tailored to meet specific business requirements and improve operational efficiency.
- Developed the frontend with Vue.js and Tailwind CSS, and the backend with Laravel using a monolithic architecture to create a cohesive and maintainable full-stack solution.
- Designed and implemented secure and scalable RESTful API endpoints to interact with a MySQL database for efficient data handling and business logic execution.

### Oracle NPM

*Student Project*

*Jan,2024-May,2024*

- Collaborated with Oracle in the development of an NPM package, enabling seamless integration with front-end frameworks (React, Vue, Angular), as well as providing a connection to the Oracle database.
- Contributed to Agile methodologies adoption by consistently attending scrums, helping remove blockers, and optimizing team communication for more efficient project execution.
- Developed detailed and clear GitHub documentation covering installation, framework-specific integration, and Oracle DB connection setup to enhance developer experience.

### Gamebook

*Student Project*

*Aug,2023-Nov,2023*

- Developed a React-based video game catalog from scratch, enabling users to browse, search, and save games to a personalized library.
- Designed and managed a MongoDB database to store user records and personal video game collections.
- Implemented RESTful API with Express.js handling request operations and route management with the database systems to process and return data efficiently.

## SKILLS

---

**Programming Languages:** JavaScript, Python, C++, HTML/CSS, SQL, Java, Go, PHP

**Framework:** Django, Bootstrap, React, FastAPI, Flask, Express, Vue, Tailwind, Laravel

**Technologies:** Git, GitHub, Bitbucket, SourceTree, Node.js, Postman, MongoDB, PostgreSQL, AWS

**Languages:** English, Spanish(Native)
